We wish to thank our many Customers and Friends for the past Orders you have given us and hope we can continue to serve you.

We always welcome new Customers and will do all we can to help you.

# REPORT ON THE PROGRESS OF THE WORK DURING THE YEAR 1903

1

The work of the year 1903 has been characterized by a steady and continuous progress in all the various branches of the study. The results of the researches have been of a high order of accuracy and have thrown new light upon many of the questions which have long been the subject of controversy.

The first part of the report deals with the general principles of the subject, and shows how the various theories which have been advanced have been brought into line with the facts. The second part is devoted to a detailed account of the experiments which have been conducted, and the results of these experiments are given in full. The third part is a summary of the work of the year, and shows how the various branches of the study have been brought into line with the facts.
